## Melee<sup>™</sup>

Congratulations! You have purchased the most advanced pre-set high pressure Air/Nitrogen system available to the Paintball World. Your Air America® Melee<sup>™</sup> system is engineered to provide a lifetime of performance and reliability, far exceeding the most rigid demands of recreational and tournament level players.

The Melee<sup>™</sup> is a single stage regulator designed to accept inlet pressures from 0 to 3000 PSI and has been factory pre-set to an outlet pressure of 800 PSI. The quality, workmanship and adherence to the highest standards of safety, reliable and performance are achieved with precision machined high tensile strength aerospace grade aluminum alloys, hard anodized to provide a “severe service” protection against the challenging conditions of Paintball, stainless steel internals and components such as the high pressure stainless steel Air America® QuickFill™ adapter assures the player he or she has the best that money can buy. Equipped and designed with the Paintball industry standard CGA 320 male threading the Melee<sup>™</sup> will mate with the standard ASA adapter used on markers throughout the world of Paintball. While the Melee<sup>™</sup> is an economical, Air/Nitrogen system, its design performance level is that of a “Top of the Line” system and is well suited for tournament level play.

### Mounting Instructions

Your Melee<sup>™</sup> is equipped with the Paintball industry standard CGA 320 threading for mounting directly into any standard ASA adapter. Before mounting your Melee<sup>™</sup> system, always inspect the condition of the O-ring on the male portion of your CGA 320 threading. If the O ring has any visible nicks, cuts or twisting, the O ring must be replaced before mounting. *Lubricate the threads and O ring* with a light film of Paintball marker oil or suitable silicon lubricant. Insert the CGA 320 threaded male portion of your Melee<sup>™</sup> regulator into your markers ASA adapter and rotate clockwise  until it bottoms out. **Note:** *Very little effort is necessary to completely engage the CGA 320 threaded male into your ASA adapter of your marker.*

### Charging the System

Your Melee<sup>™</sup> may be charged (filled) either on or off of your marker with the standard Air America® QuickFill™ adapter, located opposite the bottle pressure gauge. To charge the system, attached a suitably rated female connector and follow the appropriate instructions for your fill station.

### \*\*\*\*CAUTION\*\*\*\*

***THE MELEE<sup>™</sup> IS RATED FOR A MAXIMUM SAFE OPERATING PRESSURE OF 3000 PSI. EXCEEDING THE SAFE OPERATING PRESSURE OF 3000 PSI MAY RESULT IN SERIOUS BODILY INJURY OR DAMAGE TO YOUR AIR SYSTEM.***

***Only qualified personnel should be allowed to fill your MELEE<sup>™</sup>***

### Adjustment

Your Melee™ system outlet pressure has been factory pre-set at 800 PSI, most markers designed for direct inlet of CO<sub>2</sub> are fully operational at 800 PSI. If your marker requires an inlet pressure that is lower than 800 PSI, a second stage or in line regulator must be installed prior to pressurizing your marker.

**NOTE: THE FACTORY PRE-SET PRESSURE SETTING CAN ONLY BE ADJUSTED AT THE AIR AMERICA® FACTORY, YOUR MELEE™ SYSTEM IS FACTORY SEALED. ANY ATTEMPT TO REMOVE THE TAMPER PROOF SEAL, ADJUST, DISASSEMBLE OR REPAIR YOUR MELEE™ WILL VOID YOUR LIMITED LIFETIME WARRANTY !**

## Maintenance

The Melee™ has been engineered to require an absolute minimum of service/maintenance. Periodically add **1 very small DROP** of marker oil into the QuickFill™ adapter prior to filling/charging to keep the QuickFill™ strut O-Ring lubricated. **All other maintenance or repairs must be done at the Air America® factory.**

**YOUR MELEE™ SYSTEM IS FACTORY SEALED.**  
**ANY ATTEMPT TO REMOVE THE TAMPER PROOF SEAL, ADJUST, DISASSEMBLE OR REPAIR YOUR MELEE™ WILL VOID YOUR LIMITED LIFETIME WARRANTY !**

**SEE ADDITIONAL TERMS AND CONDITIONS BELOW.**

## **LIMITED LIFETIME WARRANTY\***

The AIR AMERICA, INC., MELEE™ is warranted free of defects in materials, workmanship, and assembly, for the lifetime of the original purchaser. **Components that are not manufactured by AIR AMERICA, INC., i.e., pressure vessels; tanks/bottles, and gauges, are limited to the manufacturers warranty. Alterations, modifications, cross threading, abuse, misuse, or neglect of the AIR AMERICA, INC., MELEE™ system, will void your warranty.** At the option of AIR AMERICA, INC., warranted components will be repaired or replaced with the same model, system or part, or the current upgrade. The use of, or installation of, any fittings, attachments, parts or accessories, that may affect the safety or performance of the AIR AMERICA, INC., MELEE™ system, that is not manufactured or distributed by AIR AMERICA, INC., may at the exclusive option of AIR AMERICA, INC., render this warranty and all other warranties, whether expressed or implied, null and void. Any personal injury or property damage resulting from the AIR AMERICA, INC., MELEE™ system that contains fittings, parts, attachments, or accessories, that were not manufactured or distributed by AIR AMERICA, INC., shall be the responsibility of the Purchaser and not the responsibility of AIR AMERICA, INC. In any event, the monetary remedies of the Purchaser shall not exceed the retail price of the AIR AMERICA, INC., MELEE™ system.

**To exercise your Limited Lifetime Warranty in the U.S.A.:**

**For a MELEE™ system purchased in the U.S.A., please send your MELEE™ system, return postage/shipping prepaid, together with a detailed explanation of the warranty request to:**
