

NOX “KILO” Shocker Bolt

Nox is proud to introduce the new Shocker “KILO” bolt. This patent pending design is a hybrid of Ertalyte TX and anodized aluminum and has been in test for over ten months by different professional teams and players. This bolt is super light and highly durable, so no more worrying about the bolt tip scratching.

Key Features:

- Main Body made of Ertalyte TX “Self Lubricating Material”
- Anodized Aluminum front tip for maximum reliability (eliminates bolt scratching)
- Same Great efficiency as our Previous NOX NV bolts ~1500 per 45/68
- Newly designed bolt face provides maximum ball contact area for reducing ball breakage.
- Smooth radius bolt tip eliminates 2nd ball in stack clipping
- Improved slot shape for superior air flow
- 40% lighter than the Stock HE bolt (Please see pictures below)
- Increases bolt cycle speed.
- Bolt is professionally manufactured on state of the art CNC machines to precision tolerances.

Stock bolt 30 grams

Nox KILO bolt is 17.9 grams
